

Hello, my name is Mari Anzicek I am a resident in District 6, and my family lives in the Hubbard Richard Neighborhood. My family's health is affected by dust and I strongly support a Fugitive Dust Ordinance to protect our health.

My family suffers daily from industrial dust and bad air quality in our city. We can't escape the dust and it is worse than ever. We can't keep our cars or house clean inside because every day there is a new coating of dust. While I understand jobs are important so is the health of our residents. When we allow industry to run rampant for the sake of jobs, it costs our residents every day in their health.

We need stronger action to clean our air and protect our community. The Fugitive Dust Ordinance amendment is one step you can take to improve our city's health. We know that dust comes from multiple sources and that it has health-damaging toxic particles in it, so we need a stronger ordinance that gives the city more power to act on violations, including increasing fines and the ability to stop operations if a facility continues to violate dust restrictions.

Please take action on cleaning up our air with the Fugitive Dust Ordinance.

Thank you
Mari Anzicek
