

I would like to make the requests that First Amendment rights not be impeded by a buffer zone because of personal experience 35 years ago when I was taking the abortion clinic in Southgate for doctor Hydari was told I was going for my first prenatal visit. After being impregnated by my high school ROTC teacher who was married and had four children my age. I was 16 at the time and he was 38 retired from the Marine Corps. There was no one on the sidewalk the day that I went or I never would have gone in I didn't know and I especially didn't know about people who helped. So I was physically held down by Dr. Hydari I fought to no avail and then was told at the time moved that would die it would be over in 5 minutes and I could go on with my life that changed my entire life if there had been one person on the sidewalk that day I never would have gone in I thought I was there for an appointment for an exam and if there had been one person outside the clinic I feel that never would have happened I never would have gone inside. Around the clinic that already have the normal buffer zone between public property and private property if you add to that might be driving away people who would have come to help give hope to the girls and number two you'll cause the police a lot of hassle because it's another reason they can call the police and playing that you're breaking a rule that then they have before whether you're actually doing it or not I've been out outside the clinic for 30 years and I've had the police called on me my friend and they told them lies said they were warrants and they meant for me but they were insisting my friend was me and I had no warrants none of it was true eventually the policeman class federal agents apologize and went away. Also for the police when in fact it's very important that they will be called out more out there and I'm requested that they set limits themselves is not me put in place only protect these places which seem to be more like protected like the altars of Ball or Molich seems that child sacrifice get special treatment it seems to be a sacrament of sorts for people want abortion try to call it choice from someone wasn't given the choice and I have seen it happen on more than one occasion where girls are dragging there by boyfriends or parents or grandparents kicking and screaming I know people like that and there needs to be people there willing to help and give resources and hope for the women and their babies even after they get abortion they still give them health city council should not take that away from those who want to volunteer and be there and that add extra restrictions on a sizing our First Amendment right you don't do that other place sincerely Jennifer McCoy
